Profile

Bachelor of Arts in Business Administration with three years of international professional experience in Digital Marketing, Corporate Communications, Customer Centricity, Sustainability, and Artificial Intelligence within a global B2B company. Currently enrolled in the M.Sc. program Digital, Social and Sustainable Marketing at Darmstadt University of Applied Sciences.

Through my dual study program, I developed a strong foundation in business administration while gaining practical experience in a corporate environment. My professional exposure to Digital Marketing, Artificial Intelligence, and Sustainability has further strengthened my interest in these fields and laid the foundation for my academic specialization in the master's program.

Analytical, strategic, and results-oriented, with a strong hands-on mindset and experience in international projects, data-driven marketing, and digital communication.

Professional Experience

09/2022 - 09/2026

SIRONA Dental Systems GmbH, Bensheim

Dual Study Program, Business Administration (Industry Track)

Selected Projects & Areas of Focus

Community Management & Customer Centricity

- Bachelor's thesis on community management in digital B2B marketing, including international expert interviews, qualitative analysis, and the development of a practical community management framework to support customer-centric engagement.
- Analysis of customer centricity and community management approaches, deriving strategic recommendations for digital customer communication.

Digital Marketing & Marketing Analytics

- Analyzed global social media and digital marketing KPIs using Sprinklr to identify optimization opportunities and provide data-driven recommendations.
- Developed email marketing and customer journey recommendations for the UKINOR region based on campaign, segmentation, and content analyses using Oracle Eloqua.
- Contributed to a global YouTube strategy and benchmarking project, including competitor analysis, SEO assessment, content format evaluation, audience engagement analysis, and governance recommendations.

AI, Digital Communications & Sustainability

- Initiated AI-supported internal podcast formats using Microsoft Clipchamp and text-to-speech technologies; developed AI guidelines to support the adoption of generative AI and promote Lean AI practices.
- Created digital communication content for SharePoint, Viva Engage, Town Hall events, and leadership communications.
- Supported the BEYOND sustainability strategy with a focus on sustainability communications, sustainability reporting, sustainable packaging initiatives, and benchmarking activities.
- Conducted qualitative research on the impact of sustainability initiatives on employee engagement through interviews with employees across different regions and functions, deriving actionable recommendations.
